

Dehumidifier

The characteristics

This product is optimized and designed on the basis of adopting the advanced technology of the same kinds of products and it has super strong dehumidifying ability. The product uses R407C green environmental protective coolant and it has the characteristics of small volume, light weight, convenience in moving, simple in operation, safety and reliability etc. It has wide applications and can be used in various locations that need humidification.

- Prevent bristle, mildew and dewing
- It is automatic defrosting system and it is applicable in low temperature environment.
- It automatically stops when the water is full.
- It has overheat protection devices

Specifications

Model	CPD-15
Power source	220V
Frequency	50/60Hz
Input power	500W
Humidification volume	1.4L/h
Compressor	Sealed rotary type
Coolant	R407C(Environmental protective type)
The disposal of dehumidification water	15L manual water storage bucket and has automatic stop equipment in time of full water
Use environment	Ambient temperature 5° —35° relative humidity45%—90%
Frost melting equipment	Temperature sensor
Power source cable	About 3m
Outside dimensions	W390 × D430 × H835
Weight	33kg
Packing quantity	192 sets /40' , 96 sets /20'

Applications

It is used in the humidity control of CNC workshops, warehouses, offices, documents rooms and equipment rooms etc.
